• Git	• GitHub Actions	• GitLab CI/CD
• Docker	• Debian	• Ubuntu
• Numpy	• Pandas	• Scikit-learn
• TensorFlow	• Celery	

Professional Experience

Part-Time Backend Developer

Raya Fartak Armis

Jan 2019 - Sep 2022 (3 years and 9 months)

Isfahan, Iran

- Developed, tested, and debugged API functions and database models for three websites using the Django framework. These websites currently serve over 2,000 users and have received positive feedback for their performance and functionality.
- Rectified a critical API issue, improving customer retention and driving revenue growth.
- Developed a render engine for an online interior showroom software, enhancing rendering options and improving product accuracy and customer satisfaction.
- Optimized time-consuming functions by calculating O, then rewrote them, resulting in a 5x improvement in performance.
- Implemented two effective user interfaces using Vuetify. The UIs are completely responsive.
- Built a user-friendly admin panel with Kendo UI, simplifying website management for admins.

Full-Time Backend Developer

Raya Fartak Armis

Sep 2022 - Present

Isfahan, Iran

- Implemented a new Django-based trade bot that trades leveraged USDT futures markets on Binance, which led to an increase in profits for the company.
- Taught 3 interns about the Django framework through hands-on training, enhancing their Django skills and contributing to better products.
- Created a Vuetify-based landing page that improved user engagement and enhanced the overall look and feel.
- Implemented a code that effectively caches time-consuming query results, leading to a notable increase in performance and overall speed.
- Integrated Elasticsearch, enhancing search API performance and user experience in the legacy ecommerce.
- Designed and implemented a user referral-based rating and reward system, boosting ecommerce sales and customer engagement.
- Collaborated on a waste management software, tackling GIS challenges and enhancing the effectiveness of waste management strategies.
- Built an admin panel using Vuetify, streamlining operations and making managing tasks more efficient.
- Teamed up to create the user interface for an e-commerce project, personally designing and implementing 3 key pages that enriched the online shopping experience.
- Implemented an Instagram-like story feature for admins, providing a new way to share updates and engage with the platform.

Open-Source Projects

Django Ecommerce (github.com/siavashbamshadnia/django_ecommerce)

A simple Django-based ecommerce application with a custom model and MySQL database, secured with Simple JWT authentication, and provided APIs for managing products, categories, and users.

Django ChatGPT Simple CMS (github.com/siavashbamshadnia/django_chatgpt_simple_cms)

A simple CMS with Django that utilizes ChatGPT for generating post titles, summaries, and content, integrated with OpenAI's API, and developed automated tests using Selenium.
