Summary

Software engineer with 6+ years of experience building web backends in PHP and frontends in Vue.js. Skilled in REST APIs, OOP, design patterns, and JavaScript. Proven track record in improving performance and mentoring junior developers.

Professional Experience

Senior Software Engineer

March 2023 - Present

SnappCarFix

Isfahan, Iran

SnappCarFix, part of Iran's Uber-like app Snapp, offers an online platform for car parts and service centers, serving 3.5M+ users each month.

- Implemented a payment gateway microservice, enhancing payment processes and financial reporting.
- Cleared more than 100 performance bottlenecks, resulting in a 5x improvement in performance on average.
- Participated in refactoring the entire accounting module that eliminated the need for many manual tasks.
- Wrote more than 100 unit tests, ensuring everything is working fine.
- Built an admin panel using Vuetify, streamlining operations and making managing tasks more efficient.

Software Engineer

Jan 2021 - Feb 2023 (2 years and 1 month)

Raya Fartak Armis

Isfahan, Iran

Raya Fartak Armis works in innovative tech like VR, AR, XR, and provides advanced digital marketing, website, and app design services.

- Implemented advanced caching, cutting response time by 60% and boosting user engagement by 25% in three months.
- Integrated Elasticsearch, improving search API performance and user experience.
- Mentored 4 interns in Laravel, helping them improve their skills and contribute to product development.
- Shifted heavy computations to the database level, resulted in exceptional performance, outperforming PHP-based approaches.
- Implemented two effective user interfaces using Vuetify. The UIs are completely responsive.

Software Engineer

Jan 2019 - Jan 2021 (2 years)

Sepano Intelligent Systems

Isfahan, Iran

Sepano Intelligent Systems is a software company specializing in intelligent systems, partners with Isfahan University.

- Built and maintained APIs and database models in Laravel for three websites serving 2,000+ users
- Fixed many critical API issues which lead to better functionality of the applications.
- Built a user-friendly admin panel with Kendo UI, simplifying website management for admins.
